

Dream Corner

I started my Mary Kay business in April of 2001. I was a stay at home mom with a one year old daughter, and my husband was in school while also working full time. We lived in a one bedroom apartment and drove a car that was falling apart! I really wanted to add some income to our family, but I did not want a job that would take me away from my most important job as "mommy". I was invited to a Mary Kay event. Believe me, I was not looking for a career with Mary Kay-I was way too cool for that! But when I saw all of the ordinary women at this meeting making money and earning cars and jewelry, I thought "Surely if they can do this, so can I!"

So I started my business that same night. I went all out and within my first 5 months in this company I had earned the use of a free Mary Kay car and I had also promoted myself into a well paid directorship position. We were able to buy our first home in December of that same year-and this time there were 5 bedrooms and 2 kitchens! In 2004 my husband and I decided to pursue his dream of being an artist. So together we decided to quit his job and sell our house and relocate to Connecticut so that he could go to art school. It was the confidence I had in my Mary Kay business that gave me the GUTS to make this big move.

We now live in Philadelphia and my husband has just a few more months of school. For the past 4 ½ years I have been able to support my family with our Mary Kay company and also drive a beautiful pink trophy on wheels. We have enjoyed 2 cash paid vacations to Mexico and countless other fun vacations because of Mary Kay. But still, the best part for me is the flexibility I enjoy in my life and how that has enriched our family and my role as a mother.
